DECLARATION

- Rebate of \$2/watt up to 25,000 watts (25 kW) on expanded or new systems operational after 12/31/09, maximum rebate of \$50,000
- Solar equipment **must** be net meter interconnected with an approved net metering agreement between above applicant and AmerenUE
- Retail account must be active and in good payment standing
- Solar system must be permanently installed on the applicant's premises
- Solar system must remain in place on premises for the duration of its useful life – a min. of 10 years
- Equipment must be new, commercially available and carry a min. 10 year warranty
- The DC wattage rating provided by the original manufacturer will be used to determine rebate amount
- A complete application and all necessary backup are required to be submitted to Ameren in order to qualify to receive the solar rebate (necessary backup includes: detailed invoice of equipment, proof of warranty and specification sheets on each component)
- Business corporations receiving a \$600 or more rebate will receive a 1099 (please consult your tax advisor with any questions)
- I understand that this program has a limited budget, and that applications will be accepted on a first-come, first-served basis, while funds are available. It is possible that I may be notified I have been placed on a waiting list for the next year's rebate program if funds run out for the current year. This program may be modified or discontinued at any time without notices.
- S-RECs created by the production of solar renewable energy from the installed solar system belong to the customer.

The undersigned warrants, certifies and represents that the information provided in this form is true and correct to the best of my knowledge; and the installation meets all Missouri Net Metering and Solar Electric Rebate Program requirements.
